

SPAPURE

As business' are trying to recover from interruptions due to recent International events, all business' are scrambling for scant resources. In the case of Haviland, makers of ProTeam and SpaPure Brand of water care products, we too are experiencing the same shortages. As a result we are experiencing interruptions and delays in acquiring packaging components such as our beautiful cobalt bottle and signifying caps colors.

We are working hard with our suppliers to obtain all the necessary products to maintain our look and appearance without significant interruptions. However, to get our award-winning chemistry to our dealers in a timely manner, we are choosing to substitute different color bottles and caps that may not otherwise conform to our usual product appearance. These aesthetic changes will be temporary until our supply chain normalizes. Unfortunately, these temporary changes will continue until 2022.

Be rest assured, that if it says SPAPURE or PROTEAM on the container, that the product inside has gone through our standard process for quality controls.

If there is any questions about the product you have purchased feel free to contact any of us at Haviland.

Thanks,

David M. O'Brien
